

New generation of Time & Cost Estimation Software

PLANS

Web-based software designed to streamline well planning from initial scoping to AFE generation.

CAMPAIGN MODELING

Calculate time and cost for entire well campaigns.

Integrate historical offset data for robust modeling.

COLLABORATIVE WORKSPACES

Distribute workload seamlessly across remote teams.

Assign tasks with easy-to-use action tracking system.

TAGGING

Tag elements to assess their contributions to time and cost.

Filter by tag for batch operations and NPT insights.

AUTO - DISTRIBUTION

Automate input distributions from historical data.

Reduce manual data entry and minimize errors.

MODERN ARCHITECTURE & INTEGRATIONS

Built on a modern framework with open API.

Supports integration for both input and output systems.

SECURITY & COMPLIANCE

Aligns with industry-leading cybersecurity standards.

Supports SSO for seamless and secure user access management.

New generation of Time & Cost Estimation Software

Campaign modeling

Harness the power of Monte Carlo simulation for precise time and cost estimates across your entire campaign. PLANS™ delivers detailed probabilistic forecasts (P10, P50, P90), helping to maximise efficiency and minimise uncertainty.

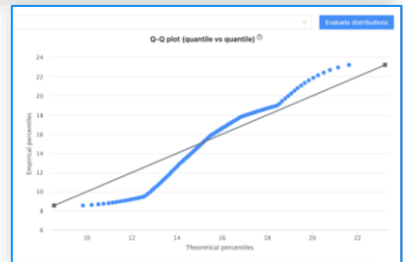

Action Tracker

Simplify task assignment and tracking with the new Actions feature. Easily assign tasks to any entity, monitor progress, and view all pending actions in a calendar or list view. Enhance collaboration and ensure timely task completion across your workspace.

Date	Title	Description
23.10.2024	Align cost model with SAP	Review and adjust the cost model to ensure it accurately reflects...more
16.10.2024	Fill out the operations	Outline the step-by-step sequence of operations required for t...more
07.10.2024	Send AFE for approval	Prepare the AFE report with all necessary details and support...more
01.10.2024	Need new input for "Drill Forde FM"	Review and find new input for this entity
30.09.2024	Create additional contingency	Include contingency for running expandable liner/bags
26.09.2024	Incident Report	Please provide the incident report for the event that happened...more
26.09.2024	Casing Issues	Severe casing wear
01.07.2024	Apply the new cost item #398	Due to new contract, please apply the correct cost
12.04.2024	Test	Can you check this action?

Auto-distribution

Utilise your historical offset well data in PLANS™ to generate statistical distributions for inputs, as the algorithm recommends optimal graphical fits based on data points to ensure accurate time and cost estimates.
